BAPCO[®] SYSMARK[®] 2014 RESULTS

Benchmark	SYSMark 2014
Version	1.0.2.30
Project name	A1009494
Completion date	2016-02-08 14:10:01
Iterations	3
License type	Small Business and Education (64 bit) (2170)
System conditioning	True
Process Idle task	True

Scores	Office Productivity	Media Creation	Data/Financial Analysis	SM 2014 Overall Rating
Scenario Rating	1327	1321	1656	1427
Iteration 1	1258	1275	1654	
Iteration 2	1344	1347	1651	
Iteration 3	1379	1341	1665	
Calibration	1000	1000	1000	1000

BAPCO(R) LEGAL DISCLAIMERS

Business Applications Performance Corporation (BAPCo(R)) is a non-profit consortium with a charter to develop and distribute a set of objective performance benchmarks for personal computers based on popular computer applications and industry standard operating systems.

ABOUT THE CALIBRATION SYSTEM

The calibration system is a system chosen as a reference point for all other SYSmark(R) 2014 results. BAPCo chose the configuration above for its wide availability and its representation of a typical mainstream PC at the time of release of SYSmark(R) 2014.

SYSmark(R) has been calibrated in such a way that a PC with performance equivalent to this calibration system for a given workload will have a performance rating of 1000. A system twice as fast as the calibration system on a given workload (or, equivalently, that responds in half the time on average) will have a performance rating of 2000. This is true for both overall ratings and scenario ratings.
