BAPCO[®] SYSMARK[®] 2014 RESULTS

Benchmark	SYSMark 2014
Version	1.5.3.123
Project name	A1009744
Completion date	2020-12-09 00:20:06
Iterations	3
License type	Small Business and Education (32 (3062))
System conditioning	True
Process Idle task	True

Scores	Office Productivity	Media Creation	Data/Financial Analysis	SM 2014 Overall Rating
Scenario Rating	1695	2228	3053	2259
Iteration 1	1699	2227	3058	
Iteration 2	1692	2225	3058	
Iteration 3	1694	2231	3041	
Calibration	1000	1000	1000	1000

Windows Defender	Enabled	Disabled

BAPCO(R) LEGAL DISCLAIMERS

Business Applications Performance Corporation (BAPCo(R)) is a non-profit consortium with a charter to develop and distribute a set of objective performance benchmarks for personal computers based on popular computer applications and industry standard operating systems.

ABOUT THE CALIBRATION SYSTEM

The calibration system is a system chosen as a reference point for all other SYSmark(R) 2014 results. BAPCo chose the configuration above for its wide availability and its representation of a typical mainstream PC at the time of release of SYSmark(R) 2014.

SYSmark(R) has been calibrated in such a way that a PC with performance equivalent to this calibration system for a given workload will have a performance rating of 1000. A system twice as fast as the calibration system on a given workload (or, equivalently, that responds in half the time on average) will have a performance rating of 2000. This is true for both overall ratings and scenario ratings.
